Directions

Natural Landscapes Nursery is located near Rt. 1 in extreme southeastern PA, roughly halfway between Philadelphia, PA and Baltimore, MD, and 12 miles from Longwood Gardens. We encourage customers to pick up their orders at the nursery, but for larger orders we can arrange delivery by pickup truck and trailer or tractor-trailer.

Address - 354 N. Jennersville Rd. (Rt. 796)
West Grove, PA 19390
Phone/fax - (610) 869-3788

Local Route 1 exits:

From Rt. 1: Take the Jennersville exit onto Rt. 796 and go north, away from the traffic light. From the exit you will see a warehouse and a florist called "Sweet Peas" in a gray block building on the right side of the road. Turn right into the gravel drive 30' past the grey block Sweet Peas building, on the far side of the post-and-rail fence and before the **red mailbox #354**. The nursery is behind "Sweet Peas". Please bear left at the Y in the driveway if you are driving a large vehicle. The house and office will be downhill, where the lower arm of the driveway leads.

From Rt. 41 going south: After crossing Rt. 10, go about 2.8 miles and turn right onto Rt. 796 south. Go a few miles and cross the intersection with Ewing Rd., then turn left into the next driveway (**red mailbox, #354**) just before the grey block "Sweet Peas" building. If you reach the intersection of Rt. 796 and Rt. 1, you'll have gone too far.

From Rt. I95 going north from the Baltimore area: Exit at Perryville, Rt. 275, immediately past the Susquehanna River bridge tollbooth. Go right on Rt. 275 until you reach a T intersection with a stoplight. Turn right on Rt. 276, go through the traffic circle, and you'll come to an intersection with a flashing light. Take a right onto Rt. 1 north and continue until you reach Rt. 796 at the Jennersville exit (Mile 12), then follow the directions above. (Distance is 24 mi. from Rt. 95)

Welcome to Natural Landscapes Nursery

All of us at Natural Landscapes Nursery would like to extend our sincere thanks to our customers for your support of our nursery. We appreciate your work in dispersing our native flora out into the landscapes you create. Together we're creating a more livable world, and we look forward to supplying you with quality native plants in the coming year. We've been working on our website, so please check it out at <http://www.NaturalLandscapesNursery.com> for pictures and descriptions of many of the plants we carry. You are most welcome to make an appointment to come see our nursery, look at the stock, and, if you choose, tag the plants for your project.

For over 25 years, we have dedicated our 44-acre nursery to growing native shrubs and trees and making them available for use in planted landscapes. Our plants are bed-grown in specially amended beds, well-mulched, never sprayed with insecticides, and minimally fertilized. Our plants are not irrigated in the field, so your customers will receive plants that are well-established in the real world. Transplanting success is further improved by our root-pruning, which provides denser root systems. For your convenience, our plants are also grown to permit hand-digging to your order by our skilled nursery crew through most of the growing season.

Because of the way we grow our stock, our customers report that they rarely or never have experienced losses with our B&B plants. If you ever experience a loss with our plants, please contact us. We want you to succeed with your planting.

Please call, fax, or email your plant list to check on availability.

Thank you for landscaping with natives,
Jim Plyler

\$55 \$75

Viburnum nudum – Smooth Witherod

3' 3-4'
\$45. \$55

Most of our plants are grown from seed and take a variety of unique forms, making pricing a challenge at times. We follow the guidelines above, but prices may need to reflect width (for low growers) or maturity rather than height. Choice specimens may be priced individually, particularly with the native azaleas...

Terms and conditions of sale

Prices are subject to change without notice, as availability of stock changes. Specimen plants may be priced individually.

Payment is due on pickup or delivery, or net 30 days for those with established credit.

Plants should be picked up no more than 7 days after your notification that they are ready. Please call to let us know when you are coming.

Plants we sell will be of good quality and true to name. We cannot guarantee their survival as we have no control over the plants after they leave the nursery.

We will "summer dig" most material, but may request a surcharge to cover the extra costs of digging plants in full leaf.

Please be sure to bring a nursery tarp to cover and protect your plants in transit.

We want you to be successful with your planting. Please call us immediately if you have concerns about any of the plants we have supplied.

Thank you!
